No part of this publication may be reproduced or transmitted in any form or by any means, electronic or mechanical, including photocopy, recording, or any information storage and retrieval system, without permission in writing from the copyright owner.

The appearance of the code at the bottom of the first page of an article in this journal indicates the copyright owner's consent that copies of the article may be made for personal or internal use, or for the personal or internal use of specific clients. This consent is given on the condition, however, that the copier pay the stated per copy fee through the Copyright Clearance Center, Inc. (222 Rosewood Drive, Danvers, Massachusetts 01923), for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale. Copy fees for pre-1994 articles are as shown on the article title pages; if no fee code appears on the title page, the copy fee is the same as for current articles.

This journal is printed on acid-free paper.

Contents of Volume 65

NUMBER 1, APRIL 1994

HUMAN STUDIES

M. YOSHIKAWA, K. ARASHIDANI, T. KAWAMOTO, AND Y. KODAMA. Aryl Hydrocarbon Hydroxylase Activity in Human Lung Tissue: In Relation to Cigarette Smoking and Lung Cancer . . 1

M. REITZ, R. COEN, AND E. LANZ. DNA Single-Strand Breaks in Peripheral Lymphocytes of Clinical Personnel with Occupational Exposure to Volatile Inhalational Anesthetics. 12

C. J. G. GUTHRIE, D. R. CHETTLE, D. M. FRANKLIN, M. C. SCOTT, H. J. MASON, A. L. WRIGHT, D. R. GOMPERTZ, A. G. DAVISON, P. M. FAYERS, AND A. J. NEWMAN TAYLOR. The Use of Multiple Parameters to Characterize Cadmium-Induced Renal Dysfunction Resulting from Occupational Exposure 22

EPIDEMIOLOGY STUDIES

JOEL SCHWARTZ. Low-Level Lead Exposure and Children's IQ: A Meta-analysis and Search for a Threshold 42

MARY C. WHITE, RUTH A. ETZEL, WALLACE D. WILCOX, AND CHRISTINE LLOYD. Exacerb[illegible] Ozone Pollution in Atlanta . [illegible] . . . 56

TOXICOLOGY STUDIES

RICHARD B. SCHLESINGER A[illegible] ive Biological Potency of Acid[illegible] for the Interpretation of Labora[illegible] . . . 69

FARHAD KHALIL-MANESH, [illegible] W. J. WEILER, BRUCE PRINS, M[illegible] Y, AND QING REN. Effect of C[illegible] otosuccinic Acid (DMSA) on [illegible] anges 86

JOHAN LUTHMAN, EVA LINDQVIST, GREG A. GERHARDT, LARS OLSON, AND BARRY H. HOFFER. Alterations in Central Monoamine Systems after Postnasal Lead Acetate Treatment in Rats 100

SAKARI LANG, VELI-MATTI KOSMA, TIMO KUMLIN, ARJA HÄLINEN, RAIMO O. SALONEN, KRISTINA SERVOMAA, TAPIO RYTÖMAA, AND JUHANI RUUSKANEN. Distribution and Short-Term Effects of Intratracheally Instilled Neutron-Irradiated UO_2 Particles in the Rat 119

EXPOSURE ASSESSMENT

TRACEY WOODRUFF, MARY S. WOLFF, DEVRA LEE DAVIS, AND DOUGLAS HAYWARD. Organochlorine Exposure Estimation in the Study of Cancer Etiology 132

UNIVERSITY OF HAWAII
LO 00L8E7L80
33 135HI XL 1374
1/95 31249-200

EXPERIMENTAL STUDIES

V. Vasudev, G. Subramanya, and N. B. Krishnamurthy. Dominant Lethals Induced by Dithane M-45 in Silkworm *Bombyx mori* 145

L. de Bruyn and L. de Jager. Electric Field Exposure and Evidence of Stress in Mice 149

Number 2, May 1994

EPIDEMIOLOGY STUDIES

Hari H. Dayal, Sadik Khuder, Robert Sharrar, and Norman Trieff. Passive Smoking in Obstructive Respiratory Diseases in an Industrialized Urban Population 161

Richard T. Burnett, Robert E. Dales, Mark E. Raizenne, Daniel Krewski, Peter W. Summers, Georgia R. Roberts, May Raad-Young, Tom Dann, and Jeff Brook. Effect of Low Ambient Levels of Ozone and Sulfates on the Frequency of Respiratory Admissions to Ontario Hospitals 172

Gerd Sällsten, Lars Barregård, Carsten Wikkelsö, and Andrejs Schütz. Mercury and Proteins in Cerebrospinal Fluid in Subjects Exposed to Mercury Vapor. 195

A. Pönkä, and M. Virtanen. Chronic Bronchitis, Emphysema, and Low-Level Air Pollution in Helsinki, 1987–1989 207

P. H. N. Saldiva, A. J. F. C. Lichtenfels, P. S. O. Paiva, I. A. Barone, M. A. Martins, E. Massad, J. C. R. Pereira, V. P. Xavier, J. M. Singer, and G. M. Böhm. Association between Air Pollution and Mortality Due to Respiratory Diseases in Children in São Paulo, Brazil: A Preliminary Report 218

Pierre Verger, Sylvaine Cordier, Le Thi Bich Thuy, Denis Bard, Le Cao Dai, Pham Hoang Phiet, Marie-France Gonnord, and Lucien Abenhaim. Correlation between Dioxin Levels in Adipose Tissue and Estimated Exposure to Agent Orange in South Vietnamese Residents 226

TOXICOLOGY STUDY

C. P. Yu, L. Zhang, G. Oberdörster, R. W. Mast, L. R. Glass, and M. J. Utell. Clearance of Refractory Ceramic Fibers (RCF) from the Rat Lung: Development of a Model 243

EXPOSURE ASSESSMENT

George D. Thurston, John E. Gorczynski, Jr., James H. Currie, Deke He, Kazuhiko Ito, Jerry Hipfner, Jed Waldman, Paul J. Lioy, and Morton Lippmann. The Nature and Origins of Acid Summer Haze Air Pollution in Metropolitan Toronto, Ontario 254

George D. Thurston, Kazuhiko Ito, Carl G. Hayes, David V. Bates, and Morton Lippmann. Respiratory Hospital Admissions and Summertime Haze Air Pollution in Toronto, Ontario: Consideration of the Role of Acid Aerosols 271

ENVIRONMENTAL ASSESSMENT

Mark R. Farfel, Peter S. J. Lees, Charles A. Rohde, Benjamin S. Lim, Desmond Bannon, and J. Julian Chisolm, Jr. Comparison of a Wipe and a Vacuum Collection Method for the Determination of Lead in Residential Dusts. 291

Author Index for Volume 65 302

NOTICE

The Subject Index for Volume 65 will appear in the November 1994 issue as part of a cumulative index for the year 1994.

INSTRUCTIONS TO AUTHORS

Manuscripts. Environmental Research publishes original reports describing studies of the toxic effects of environmental agents in humans and animals. The principal aims of the journal are to define the etiology of environmentally induced illness, and to increase understanding of the mechanisms by which environmental agents cause disease.

The study of environmental health is inherently multidisciplinary. Therefore, the journal welcomes relevant articles in:

- epidemiology and risk analysis
- toxicology
- environmental and occupational medicine
- the neurosciences
- pathology
- pharmacology
- reproductive biology
- biochemistry
- molecular and cellular biology
- mineralogy

Reports which bridge one or more of these disciplines will be particularly encouraged, as will studies employing biological markers of toxic exposure and effect.

Occasional critical reviews and selected book reviews will be included.

Submission of Manuscripts. Three copies (an original and two copies) should be submitted to:

Environmental Research
Editorial Offices
Division of Environmental and Occupational Medicine
Department of Community Medicine
Mount Sinai School of Medicine
1 Gustave L. Levy Place, Box 1057
New York, NY 10029

The original and two copies must include photocopies of all tables and figures.

Original papers only will be considered. Manuscripts are accepted for review with the understanding that the same work has not been and will not be nor is presently submitted elsewhere, and that its submission for publication has been approved by all of the authors and by the institution where the work was carried out; further, that any person cited as a source of personal communications has approved such citation. Written authorization may be required at the Editor's discretion. Articles and any other material published in *Environmental Research* represent the opinions of the author(s) and should not be construed to reflect the opinions of the Editor(s) and the Publisher.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

All papers will be published in English.

Form of Manuscript. Manuscripts should be typewritten (not mimeographed) with double or triple spacing and wide margins on high-quality bond paper. Subdivision of the article into *Abstract* (50–200 words), *Introduction, Materials and Methods, Results, Discussion, Conclusions, Acknowledgments, and References* is recommended. In addition, section headings are often useful.

Page 1 of the manuscript should contain the article title, author's name, and affiliation (include zip code where applicable). Page 2 should contain a proposed running head of fewer than 40 characters and the address of the person to whom proofs are to be sent. Number all pages consecutively beginning with the title page. Include five descriptive key words for computer-aided searching.

Abbreviations. Follow the usage established by *Chemical Abstracts.* If others are utilized define on first use.

Figures. Number all figures consecutively with Arabic numerals; legends should be typed together on a separate sheet. Lettering on the original figures should be large enough to take a reduction of 50–60 percent. Graphs should be plotted with black India ink on light blue coordinate paper, no larger than 8½ × 11 in. Grid lines that are to show in the photoreproduction should be inked in black. Photographs should be glossy prints (5 × 7 or 8 × 10 in.) with strong contrasts. X-rays should be right-reading glossy prints. Providing an overlay that indicates the most critical areas of halftones will aid in ensuring high-quality reproduction. Illustrations in color can be accepted only if the authors defray the cost.

Tables. Number all tables in order of appearance with Arabic numerals; type each table double-spaced on a separate page, including a short descriptive title typed double-spaced above the table. Footnotes to tables indicated by superscript lowercase letters, ^{a,b}, etc., should be typed double-spaced at the end of the table. Keep in mind the dimensions of the journal when planning the number of columns in a table.

Footnotes. Text footnotes should be avoided whenever possible.

References. These are to be cited in the text by the author's name and year of publication. References should be listed alphabetically in an unnumbered list at the end of the paper in the following style:

Coleman, D. C., Reid, C. P. P., and Cole, C. V. (1983). Biological strategies of nutrient cycling in soil systems. *In* "Advances in Ecological Research" (A. MacFayden and E. D. Ford, Eds.), Vol. 13, pp. 1–55. Academic Press, New York/London.

Rice, E. L. (1984). "Allelopathy," 2nd ed. Academic Press, New York.

Takács, S., and Tatár, A. (1987). Trace elements in the environment and in human organs. I. Methods and results. *Environ. Res.* **42**, 312–320.

The names of journals should be abbreviated according to *Index Medicus,* 1980, or *Chemical Abstracts Service Source Index,* 1985. Include in the reference list articles that are "in press," but "manuscript in preparation," "personal communication," and "unpublished observation" are to be avoided.

Reprints. A reprint order form will accompany the proofs. The corresponding author receives 50 reprints free of charge, and additional copies may be ordered.

Correspondence. Editorial correspondence concerning the manuscript should be addressed to:

Environmental Research
Editorial Offices
Division of Environmental and Occupational Medicine
Department of Community Medicine
Mount Sinai School of Medicine
1 Gustave L. Levy Place, Box 1057
New York, NY 10029

Correspondence concerning manuscripts in production and proofs should be addressed to:

Environmental Research
Production Department
Academic Press, Inc.
Journal Division
525 B Street, Suite 1900
San Diego, CA 92101-4495

Correspondence and information concerning subscriptions should be addressed to:

Academic Press, Inc.
Journal Subscription Department
6277 Sea Harbor Drive
Orlando, FL 32887-4900

Personal Computer Disks. Manuscripts may be submitted to *Environmental Research* on personal computer disks after the manuscript has been accepted and after all revisions have been incorporated onto the disk. Label the disk with the type of computer used, the type of software and the version number, and the disk format. All tabular material will be typeset conventionally. Art must be prepared as camera-ready copy; see the section on Figures earlier in this information for authors.

A hard copy printout of the manuscript that exactly matches the disk file must be supplied. Academic Press will not accept disks without accompanying printouts of all files on the disk. File names must clearly indicate the content of each file. The manuscript will be edited according to the style of the journal, and the proofs must be read carefully by the author. Disks that are not translatable or economical to process will not be used. The publisher reserves the right not to use the disk.

For further information on preparing disks for typesetting conversion, please contact the publisher (Editorial Supervisor, Journal Division, Academic Press, Inc., 525 B Street, Suite 1900, San Diego, California 92101-4495; telephone: (619) 699-6415; fax: (619) 699-6800).
